

Jupyter_Notebook

January 26, 2023

Add your code below following the instructions given in the course

1 My Jupyter Notebook on IBM Watson Studio

Kenneth Ikome Lyonga Fonderson Financial Analyst

I am interested in data science because as a As a data scientist, I'll compile, analyze, and extract valuable insights from data. That data has the ability to do many powerful things: improve on financial performance of a company, detect fraudulent transactions, increase sales revenue and reduce production costs just to name a few.

1.0.1 The code below is to create a list in Python

```
[1]: thislist = ["apple", "banana", "cherry"]  
      print(thislist)
```

```
['apple', 'banana', 'cherry']
```

Here is some important text!

- This is a bullet list
 - This is a bullet list
 - This is a bullet list
1. This is a numbered list
 2. This is a numbered list
 3. This is a numbered list
 4. This is a numbered list
